DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to digital radio communication apparatus having a direct inter-handset communication transition controller for making control to establish direct inter-handset communications, classified in class 455, subclass 418.
- II. Claims 8-12, drawn to digital radio communication apparatus having an attribute information storage section for storing a communication type provided by the local handset to a distant handset, classified in class 455, subclass 420.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group has separate utility such as remote programming control. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Ledbetter on 8/2/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
